General Description

TX6215 series are a highly precise, lower consumption, 3 terminal, positive voltage regulators manufactured using CMOS and laser trimming technologies. The series provides large currents with a significantly small dropout voltage. The TX6215 consists of a current limiter circuit, a driver transistor, a precision reference voltage and an error correction circuit. The series is

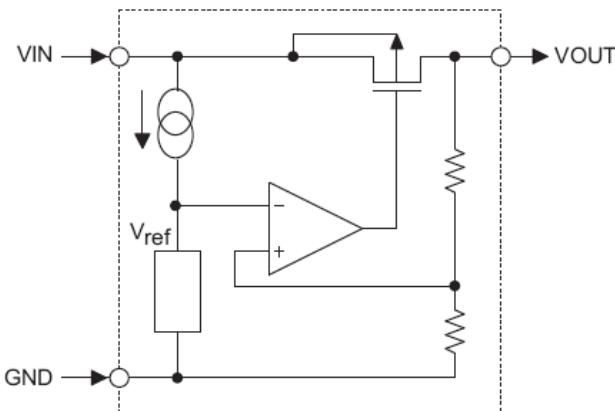

compatible with low ESR ceramic capacitors. The current limiter's fold back circuit operates as a short circuit protection as well as the output current limiter for the output pin. Output voltages are internally by laser trimming technologies. It is selectable in 0.1V increments within a range of 1.2V to 3.6V. TX6215 series are available in SOT-23 and SOT-89 packages.
